China Prosperity Fund

Energy and Low Carbon Economy Programme

Programme Overview

PROGRAMME VISION

Reduce global emissions by accelerating China's low carbon transition and implementing UK-China Clean Energy Partnership

OUTCOMES

Support China sets more ambitious targets on low carbon transition in the 14th Five Year Plan

Improve China's readiness for accelerating low carbon transition in 14th Five Year Plan

PILLAR 1

Policy recommendations and advice contributed to support the development of China's 14th Five Year Plan to drive more sustainable development and deployment of low carbon technologies in China

PILLAR 2

Policy recommendations and advice contributed to support the development of China's 14th Five Year Plan to create a pathway for reduced coal consumption and increase use of alternative energy sources in line with the Paris Agreement

PILLAR 3

policy recommendations and advice contributed to support the development of China's 14th Five Year Plan to accelerate implementation of market-led energy and low carbon sector reforms

PILLAR 4

policy recommendations and deliver activities contributed to support China's increased engagement in international energy/climate cooperation aligned with the Paris Agreement, including in overseas investment

Gender and Inclusion

- · Strong safeguarding and G&I policies and risks management systems in place within the project, with relevant training deliver to all delivery partners
- Improved G&I practices within grantees organisations

Secondary Benefits

- · Key international/UK commercial stakeholders engaged with the China programme and prepared to take advantage of potential opportunities
- UK government and businesses connected with the Chinese counterparts as a result of the programme

Mar 2022

Programme finished

14th FYP Approved by People's Congress
